

VHI VISUAL HORN INDICATOR SPECIFICATIONS

Shown is the VHI Visual Horn Indicator atop the BB-2114 shot clock. The digits shown are UniView® technology, but are also available with PanaView® technology. When the light is used on a shot clock, the VHI can be set to indicate one of the following: when the game horn sounds, when the shot clock horn sounds, when the game clock is stopped or when the game clock is at zero. It can also be used on a scoreboard to visually indicate when the horn sounds.

PRODUCT SPECIFICATIONS

- DIMENSIONS:** Height 0' 8", Width 0' 6", Depth 0' 6" (203 mm, 152 mm, 152 mm)
- POWER:** 60 W maximum per light fixture; component plate with 24 V AC relay panel and power terminals.
- CONSTRUCTION:** Ruby red lamp cover of polycarbonate material; black molded plastic base.
- LAMP:** 60 W frosted, 120 V power source.
- OPERATING TEMPERATURES:** -22 to 122 degrees Fahrenheit (-30 to 50 degrees Celsius)
- GENERAL INFORMATION:** The visual horn indicator lights whenever the horn sounds, and may be used with any Daktronics scoreboard with a horn. The VHI provides a visual means of communicating for more efficient administration of athletic events. The customer is to provide 120 V AC wiring from the scoreboard to the visual horn indicator location. Specifications and pricing are subject to change without notice.
