

Transmitter Photocell with Battery

Receiver Photocell with Battery

PHOTOCELL SENSOR PRODUCT SPECIFICATIONS

The photocell set is composed of a transmitter, receiver, and one or two chargers. The transmitter and receiver have built-in rechargeable batteries. Each of these units is designed to operate 75 hours without recharging. To increase the life of the batteries, we recommend recharging each night after use. The signal out jack is present on the receiving photo cell. This jack connected to the timer via a single pair cable. The photocell sensors use industrial infrared photocells that transmit and receive through dust, rain, and bright sunshine. The receiver photocell has an LED on top to indicate when the photocells are powered, properly aligned, and ready to function. The transmitter has an LED power indicator. The 200 ft. sensing distance makes the transmitter and receiver especially easy to line up.

PRODUCT SPECIFICATIONS

DIMENSIONS: Height 3", Width 4", Depth 6" (76 mm, 102 mm, 152 mm)

WEIGHT: Transmitter: 2.4 lb (1 kg)
Receiver: 2.4 lb (1 kg)

POWER: Rechargeable battery with external 120 V AC, 800 MA charger

OPERATING TIME: 75 hours with full charge

SENSING DISTANCE: 200 feet (61 m)

COLOR: Black

OPERATING TEMPERATURES: -40 to 158 degrees Fahrenheit (-18 to 70 degrees Celsius)

SIGNAL OUTPUT: The output conducts when the receiver sees the emitter's modulated light source.

WARRANTY/SERVICE PLAN:

Exclusive Daktronics Gold® plan in the U.S. and Canada (see SP10093 for more information).

OPTIONS:

1. Battery chargers
2. Tripods
