1 Introduction

This manual explains the installation and maintenance of Daktronics Hockey Goal Lights. For additional information regarding safety, installation, operation, or service, refer to the telephone numbers listed in Section 5: Daktronics Exchange and Repair & Return Programs (p.10). This manual is not specific to a particular installation. Project-specific information takes precedence over general information found in this manual.

Important Safety Instructions

- Read and understand all instructions before beginning the installation process.
- Do not let the power cord touch hot surfaces or hang over the edge of a table, which could damage or cut the cord.
- If an extension cord is necessary, use a three-pronged polarized cord. Arrange the cord with care so that no one will trip over or pull it out.
- Before using an extension cord, inspect the cable thoroughly and verify its compliance with the local electric codes.
- Never yank the power cord to pull the plug from the outlet. Grasp the plug and pull to disconnect.
- Disconnect power to the device when not in use or when servicing.
- Disconnect power to the device before servicing power supplies to avoid electrical shock. Power supplies run on high voltage and may cause physical injury if touched while powered.
- Do not disassemble control equipment or electronic controls of the device; failure to follow this safeguard will make the warranty null and void.
- Do not drop the control equipment or allow it to get wet.

Specifications Label

Power specifications as well as serial and model number information can be found on an ID label on the device, similar to the one shown in Figure 1.

![Specifications Label](image1)

Figure 1: Specifications Label

Please have the assembly number, model number, and the date manufactured on hand when calling Daktronics customer service to ensure the request is serviced as quickly as possible. Knowing the facility name and/or job number will also be helpful.

Resources

Figure 2 illustrates a Daktronics drawing label. This manual refers to drawings by listing the last set of digits. In the example, the drawing would be referred to as DWG-1007804. All references to drawing numbers, appendices, figures, or other manuals are presented in bold typeface.

![Drawing Number](image2)

Figure 2: Drawing Label
Any drawings referenced in a section are listed at the beginning of it as shown below:

**Reference Drawing:**
System Riser Diagram.................................................................................................DWG-1007804

Daktronics identifies manuals by the DD or ED number located on the cover page.

Ensure all applicable materials have been gathered before beginning the installation. Contact a Daktronics sales coordinator or project manager.

**Daktronics Nomenclature**

Most display components have a white label that lists the part number ([Figure 3](#)). Part numbers will also appear on certain drawings. If a component is not found in the [Replacement Parts](#) (p.9), use the label to order a replacement. Refer to [Section 5: Daktronics Exchange and Repair & Return Programs](#) (p.10) if replacing or repairing any display component.

**Goal Light Controllers**

Daktronics indoor goal lights are designed for use with an All Sport® 5000 control console. This controller uses keyboard overlays (sport inserts) to control numerous sports and scoreboard models. For operating instructions, refer to the following manual, available online at [www.daktronics.com/manuals](http://www.daktronics.com/manuals):

- **All Sport 5000 Series Control Console Operation Manual (ED-11976)**

  The All Sport console automatically controls the green timer light. An active green light disables the red goal signal. (An end-of-period goal, however, could see both lights on at the same time. Because different venues require different settings, a switch on both models permits selection of green light operation as “time = 0” or “clock stop.”)

  A handheld switch allows the goal judge to press a button once to signal a goal. The internal goal light driver has a one second delay, to prevent accidental presses. After the one second has expired, the goal judge can press the button a second time and turn off the goal light.

**NHL Model**

The NHL model goal light features wireless handheld control for activating the goal lights. Refer to the [Hockey Goal Judge Operation Quick Guide (ED-18140)](http://www.daktronics.com/manuals), which ships with the NHL goal light.
• For RC-200 operation and troubleshooting information, refer to the Remote Control System RC-200 All Sport Operation Manual (DD3572889).

• For legacy RC-100 operation and troubleshooting information, refer to the Remote Control System RC-100 All Sport Operation Manual (ED-15133).

All of the above manuals are available online at www.daktronics.com/manuals.

Specifications

The chart below details all of the mechanical specifications, circuit specifications, and power requirements for each device in this manual.

<table>
<thead>

</tr>
</tbody>
</table>

* Models with 240 VAC power at half the indicated amperage are also offered (International Use Only).
2 Mechanical Installation

Mechanical installation consists of determining the proper method of permanently mounting the goal lights. Be sure that the installation complies with local building codes.

**Note:** Daktronics assumes no liability for any installation derived from the information provided in this manual or installations designed and installed by others.

Goal Light Mounting

**Reference Drawings:**
- Mechanical Specifications- Hockey Goal Lights.................................................DWG-153913

Daktronics goal lights are typically mounted in one of two ways: elevated on a support behind the goal, or clamped to the safety glass surrounding the rink.

Each goal light comes with hanging brackets and other hardware for mounting. The brackets attach to the ends of the goal light base, and two sizes of clamps permit the unit to hang behind the safety glass for protection, or from the wall surrounding the ice. Refer to the *Protective Glass Mounting Method* on DWG-153913 in Appendix A.

Goal lights may instead be attached to a 1" threaded pipe, which elevates the unit on a pole-type support. Refer to the *1" Threaded Rod Mounting Method* on DWG-153913.
3 Electrical Installation

CAUTION: Only qualified individuals should access the electrical components of the device and its associated equipment. It is the responsibility of the electrical contractor to ensure that all electrical work meets or exceeds local and national codes. Daktronics engineering staff must approve all changes or the warranty will be void.

Installation Overview

Reference Drawings:

- Riser Diagram: Goal Indicator System.............................................................. DWG-244179
- Hockey Rink Layout- Scoreboard With Lights.................................................. DWG-276200

Electrical installation involves routing power and control signal wiring through separate conduit or wire ways. Refer to DWG-244179 and DWG-276200 in Appendix A for power/signal connections and typical system layouts.

Control signal cable and some junction boxes are not provided as part of this system and can be purchased locally or from Daktronics.

Power

Each goal light unit features a 120 VAC power cord with a three-prong plug. Install a grounded receptacle near the equipment so that the power cord can easily reach it.

Goal lights operating on 240 VAC are also available, and they are shipped equipped with a universal power plug (Pro & Varsity Models only).

Grounding

All components of a display system – including but not limited to displays, control equipment, and connected peripheral equipment – must be electrically grounded. Only qualified individuals may perform electrical work, including verification of ground resistance. Daktronics is not responsible for improper grounding or damage incurred as a result of improper grounding.

Grounding methods must meet the provisions of all applicable local and national codes. Inspect and verify all grounding methods meet the provisions of all applicable local and national codes.

Proper grounding is necessary for reliable equipment operation and general electrical safety. Failure to properly ground the display system may void the warranty, disrupt operation, damage equipment, and cause bodily harm or death.

Signal

The green and red lights on a goal light unit receive signal from different control devices.

Green Light Control

Control for the green timer light comes from the same All Sport console used for the scoreboard(s). Cable specifications and part numbers are listed on DWG-244179. Refer also to DWG-276200, which shows how the goal lights and scoreboard may be set up around the rink.
A typical installation involves the following steps:

1. Install a 1/4" phone jack junction box near the location of the All Sport controller. The same J-box for scoreboard control may be used for goal lights; the signal wires for scoreboard and goal lights are wired in parallel and connected to the same jack.

   **Note:** An optional signal hookup using a 25-pin J-box is also shown on DWG-244179.

2. Run a male-to-male 1/4" phone signal cord from the J1 jack on the All Sport to the phone jack J-box. This may already be in place for scoreboard control.

3. From the J-box near the control console, run separate signal cables to each 1/4" phone J-box installed near the goal lights. Cables should be shielded, 2-pair, 22 AWG.

4. From the 1/4" phone jack J-boxes near the goal lights, run male-to-male 1/4" phone signal cable to the J1 jack on each goal light.

**Radio Communication**
Instead of installing multiple J-boxes and running signal cable throughout the facility, a remote radio receiver kit can be installed for the goal lights to listen in on the signal broadcasted from a radio-equipped All Sport controller. Contact Daktronics for more information about this option.

**Red Light Control**
Control for the red goal lights varies depending on the model:

**Varsity & Pro Goal Lights**
Plug a handheld goal judge switch into the J2 jack on each goal light. Press the button to turn the red light(s) on and off.

**NHL Goal Lights**
Refer to the *Hockey Goal Judge Operation Quick Guide (ED-18140)* for instruction on using a wireless handheld controller to operate the goal lights.

Plug a handheld goal judge switch into the J2 jack on each goal light as a backup if desired. Press the button to turn the red light(s) on and off.
## Troubleshooting

Disconnect power before doing any repair or maintenance work on the device. Permit only qualified service personnel to access internal device electronics. Disconnect power when not using the device.

### Troubleshooting Table

This section lists potential problems with the device, indicates possible causes, and suggests corrective action. This list does not include every possible problem, but it does represent some of the more common situations that may occur.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Solution/Items to Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goal light doesn’t illuminate and console doesn’t work</td>
<td>No power to the goal light</td>
<td>Check that the main circuit breaker for the goal light is on.</td>
</tr>
<tr>
<td></td>
<td>No power to the control console</td>
<td>Check that the goal light is receiving 120 or 240 VAC power.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Ensure the console is plugged into a 120 or 240 VAC power supply.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Exchange the console with a working one, and enter the correct sport code and/or radio settings to test. Replace console if necessary.</td>
</tr>
<tr>
<td>Goal light doesn’t illuminate, but console works</td>
<td>No wired signal from control console</td>
<td>Check that the goal light is receiving 120 or 240 VAC power.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Check that the red DS2 LED on the driver lights up when sending commands from the controller; see Goal Light Driver (p.8).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Check that the display is receiving 100, 120, or 240 VAC power.</td>
</tr>
<tr>
<td></td>

Goal Light Driver

Reference Drawings:
Reference- Hockey Goal Light Driver .............................................................. DWG-155363

The goal light driver performs the task of switching lights on and off. Refer to DWG-155363 in Appendix A for detailed driver pin out/switch specifications. When troubleshooting driver problems, two LEDs labeled DS1 and DS2 provide the following diagnostic information:

<table>
<thead>
<tr>
<th>LED</th>
<th>Color</th>
<th>Function</th>
<th>Operation</th>
<th>Summary</th>
</tr>
</thead>
<tbody>
<tr>
<td>DS1</td>
<td>Red</td>
<td>Signal RX</td>
<td>Steady on or blinking</td>
<td>DS1 will be on or blinking when the driver is receiving a signal and off when there is no signal.</td>
</tr>
<tr>
<td>DS2</td>
<td>Green</td>
<td>Power</td>
<td>Steady on</td>
<td>DS2 will be on and steady to indicate the driver has power.</td>
</tr>
</tbody>
</table>

Note: While it is necessary to have the display powered on to check the LED status indicators, always disconnect power before servicing.

Driver Status Indicators

Figure 4: Driver Status Indicators

Replacing a Driver
If the driver status indicators do not appear to be working correctly, it may be necessary to replace the driver.

1. Remove the screws on the top of the goal light, and lift off the cover.
2. Disconnect all plugs from the driver by squeezing together the locking tabs and pulling the connectors free. It may be helpful to label the cables or take a picture to know which plug goes to which jack when connecting the replacement driver.
3. Remove the nuts securing the driver to the driver tray.
4. Carefully lift the driver from the device and place it on a clean, flat surface.
5. Position a new driver over the screws and tighten the nuts.
6. Reconnect all plugs to their mating jacks the driver. The connectors are keyed and will attach in one way only. Do not force the connections.
7. Close and secure the cover, and then power up and test the goal light to verify the issue has been resolved.
Schematics
For advanced troubleshooting and repair, it may be necessary to consult the schematic drawings. Located in Appendix A, the schematic drawings show detailed power and signal wiring diagrams of internal device components.

Replacement Parts
The following table contains device components that may require replacement. Many of the other device components will have attached part number labels.

<table>
<thead>
<tr>

</tbody>
</table>

**Note:** Refer to Appendix B for manufacturer’s replacement parts of the red rotating beacon used on the Pro Model goal light.

Refer to Section 5: Daktronics Exchange and Repair & Return Programs (p.10) for information on exchanging or returning parts.
5 Daktronics Exchange and Repair & Return Programs

Exchange Program
The Daktronics Exchange Program is a service for quickly replacing key components in need of repair. If a component fails, Daktronics sends a replacement part to the customer who, in turn, returns the failed component to Daktronics. This decreases equipment downtime. Customers who follow the program guidelines explained below will receive this service.

Before contacting Daktronics, identify these important numbers:

Display Serial Number: ________________________________________________________________
Display Model Number: _______________________________________________________________
Job/Contract Number: _______________________________________________________________
Date Manufactured/Installed: _________________________________________________________
Daktronics Customer ID Number: ______________________________________________________

To participate in the Exchange Program, follow these steps:

<table>
<thead>
<tr>
<th>Market Description</th>
<th>Customer Service Number</th>
</tr>
</thead>
</table>
| Schools (including community/junior colleges), religious organizations, municipal clubs, and community centers | 877-605-1115
|                                                                                   | Fax: 605-697-4444              |
| Universities and professional sporting events, live events for auditoriums, and arenas | 866-343-6018
|                                                                                   | Fax: 605-697-4444              |

2. When the new exchange part is received, mail the old part to Daktronics.
   If the replacement part fixes the problem, send in the problem part being replaced.
   a. Package the old part in the same shipping materials in which the replacement part arrived.
   b. Fill out and attach the enclosed UPS shipping document.
   c. Ship the part to Daktronics.

3. The defective or unused parts must be returned to Daktronics within 5 weeks of initial order shipment.
   If any part is not returned within five (5) weeks, a non-refundable invoice will be presented to the customer for the costs of replenishing the exchange parts inventory with a new part. Daktronics reserves the right to refuse parts that have been damaged due to acts of nature or causes other than normal wear and tear.
Repair & Return Program
For items not subject to exchange, Daktronics offers a Repair & Return Program. To send a part for repair, follow these steps:

1. **Call or fax Daktronics Customer Service.**
   Refer to the appropriate number in the chart on the previous page.

2. **Receive a case number before shipping.**
   This expedites repair of the part.

3. **Package and pad the item carefully to prevent damage during shipment.**
   Electronic components, such as printed circuit boards, should be placed in an antistatic bag before boxing. Daktronics does not recommend using packing peanuts when shipping.

4. **Enclose:**
   - name
   - address
   - phone number
   - the case number
   - a clear description of symptoms

5. **Ship to:**
   Daktronics Customer Service
   [Case #]
   201 Daktronics Drive, Dock E
   Brookings, SD 57006

Daktronics Warranty & Limitation of Liability
The Daktronics Warranty & Limitation of Liability is located at the end of this manual. The Warranty is independent of Extended Service agreements and is the authority in matters of service, repair, and display operation.
This page intentionally left blank.

PRO MODEL GOAL LIGHT

Approximate weight: 12 lb

VARSITY MODEL GOAL LIGHT

Approximate weight: 10 lb

1" threaded rod mounting method:

Mount 1" pipe flange on the bottom of the goal light unit on to 1" threaded pipe (not provided).

Bracket shown are provided with the pro goal light model (optional on varsity model). 

Assemble the brackets as shown above, and attach them to the goal light unit.

Hang the brackets on the glass or boards surrounding the ice and tighten the t-bolts.

Two sizes of clamps are provided to allow attachment to a range of material thickness.

"Boards" or "glass" surrounding the ice.

1" pipe flange (PM-1006) are provided on varsity goal light model (optional on pro model).

C Daktronics Warranty & Limitation of Liability

This section includes the Daktronics Warranty & Limitation of Liability statement (SL-02374).
This page intentionally left blank.
This Warranty and Limitation of Liability (the “Warranty”) sets forth the warranty provided by Daktronics with respect to the Equipment. By accepting delivery of the Equipment, Purchaser and End User agree to be bound by and accept these terms and conditions. Unless otherwise defined herein, all terms within the Warranty shall have the same meaning and definition as provided elsewhere in the Agreement.

DAKTRONICS WILL ONLY BE OBLIGATED TO HONOR THE WARRANTY SET FORTH IN THESE TERMS AND CONDITIONS UPON RECEIPT OF FULL PAYMENT FOR THE EQUIPMENT.

1. Warranty Coverage

   A. Daktronics warrants to the original end user (the “End User”) that the Equipment will be free from Defects (as defined below) in materials and workmanship for a period of one (1) year (the “Warranty Period”). The Warranty Period shall commence on the earlier of: (i) four weeks from the date that the Equipment leaves Daktronics’ facility; or (ii) Substantial Completion as defined herein. The Warranty Period shall expire on the first anniversary of the commencement date.

   “Substantial Completion” means the operational availability of the Equipment to the End User in accordance with the Equipment’s specifications, without regard to punch-list items, or other non-substantial items which do not affect the operation of the Equipment.

   B. Daktronics’ obligation under this Warranty is limited to, at Daktronics’ option, replacing or repairing, any Equipment or part thereof that is found by Daktronics not to conform to the Equipment’s specifications. Unless otherwise directed by Daktronics, any defective part or component shall be returned to Daktronics for repair or replacement. This Warranty does not include on-site labor charges to remove or install these components. Daktronics may, at its option, provide on-site warranty service. Daktronics shall have a reasonable period of time to make such replacements or repairs and all labor associated therewith shall be performed during regular working hours. Regular working hours are Monday through Friday between 8:00 a.m. and 5:00 p.m. at the location where labor is performed, excluding any holidays observed by Daktronics.

   C. Daktronics shall pay ground transportation charges for the return of any defective component of the Equipment. All such items shall be shipped by End User DDP Daktronics designated facility. If returned Equipment is repaired or replaced under the terms of this Warranty, Daktronics will prepay ground transportation charges back to End User and shall ship such items DDP End User’s designated facility; otherwise, End User shall pay transportation charges to return the Equipment back to the End User and such Equipment shall be shipped Ex Works Daktronics designated facility. All returns must be pre-approved by Daktronics before shipment. Daktronics shall not be obligated to pay freight for any unapproved return. End User shall pay any upgraded or expedited transportation charges.

   D. Any replacement parts or Equipment will be new or serviceably used, comparable in function and performance to the original part or Equipment, and warranted for the remainder of the Warranty Period. Purchasing additional parts or Equipment from the Seller does not extend the Warranty Period.

   E. Defects shall be defined as follows. With regard to the Equipment (excepting LEDs), a “Defect” shall refer to a material variance from the design specifications that prohibit the Equipment from operating for its intended use. With respect to LEDs, “Defects” are defined as LED pixels that cease to emit light. Unless otherwise expressly provided, this Warranty does not impose any duty or liability upon Daktronics for partial LED pixel degradation. Notwithstanding the foregoing, in no event does this Warranty include LED pixel degradation caused by UV light. This Warranty does not provide for the replacement or installation of communication methods including but not limited to, wire, fiber optic cable, conduit, trenching, or for the purpose of overcoming local site interference radio equipment substitutions.

   EXCEPT AS OTHERWISE EXPRESSLY SET FORTH IN THIS WARRANTY, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, DAKTRONICS DISCLAIMS ANY AND ALL OTHER PROMISES, REPRESENTATIONS AND WARRANTIES APPLICABLE TO THE EQUIPMENT AND REPLACES ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ACCURACY OR QUALITY OF DATA. OTHER ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY DAKTRONICS, ITS AGENTS OR EMPLOYEES, SHALL NOT CREATE A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS LIMITED WARRANTY.

   THIS LIMITED WARRANTY IS NOT TRANSFERABLE.

2. Exclusion from Warranty Coverage

This Warranty does not impose any duty or liability upon Daktronics for any:

   A. damage occurring at any time, during shipment of Equipment unless otherwise provided for in the Agreement. When returning Equipment to Daktronics for repair or replacement, End User assumes all risk of loss or damage, agrees to use any shipping containers that might be provided by Daktronics, and to ship the Equipment in the manner prescribed by Daktronics;

   B. damage caused by: (i) the improper handling, installation, adjustment, use, repair, or service of the Equipment, or (ii) any physical damage which includes, but is not limited to, missing, broken, or cracked components resulting from non-electrical causes; altered, scratched, or fractured electronic traces; missing or gauged solder pads; cuts or clipped wires; crushed, cracked, punctured, or bent circuit boards; or tampering with any electronic connections, provided that such damage is not caused by personnel of Daktronics or its authorized repair agents;

   C. damage caused by the failure to provide a continuously suitable environment, including, but not limited to: (i) neglect or misuse; (ii) improper power including, without limitation, a failure or sudden surge of electrical power; (iii) improper air conditioning, humidity control, or other environmental conditions outside of the Equipment’s technical specifications such as extreme temperatures, corrosives and metallic pollutants; or (iv) any other cause other than ordinary use;
D. damage caused by fire, flood, earthquake, water, wind, lightning or other natural disaster, strike, inability to obtain materials or utilities, war, terrorism, civil disturbance, or any other cause beyond Daktronics’ reasonable control;

E. failure to adjust, repair or replace any item of Equipment if it would be impractical for Daktronics personnel to do so because of connection of the Equipment by mechanical or electrical means to another device not supplied by Daktronics, or the existence of general environmental conditions at the site that pose a danger to Daktronics personnel;

F. statements made about the product by any salesperson, dealer, distributor or agent, unless such statements are in a written document signed by an officer of Daktronics. Such statements as are not included in a signed writing do not constitute warranties, shall not be relied upon by End User and are not part of the contract of sale;

G. damage arising from the use of Daktronics products in any application other than the commercial and industrial applications for which they are intended, unless, upon request, such use is specifically approved in writing by Daktronics;

H. replenishment of spare parts. In the event the Equipment was purchased with a spare parts package, the parties acknowledge and agree that the spare parts package is designed to exhaust over the life of the Equipment, and as such, the replenishment of the spare parts package is not included in the scope of this Warranty;

I. security or functionality of the End User’s network or systems, or anti-virus software updates;

J. performance of preventive maintenance;

K. third-party systems and other ancillary equipment, including without limitation front-end video control systems, audio systems, video processors and players, HVAC equipment, batteries and LCD screens;

L. incorporation of accessories, attachments, software or other devices not furnished by Daktronics; or

M. paint or refinishing the Equipment or furnishing material for this purpose.

3. Limitation of Liability

Daktronics shall be under no obligation to furnish continued service under this Warranty if alterations are made to the Equipment without the prior written approval of Daktronics.

It is specifically agreed that the price of the Equipment is based upon the following limitation of liability. In no event shall Daktronics (including its subsidiaries, affiliates, officers, directors, employees, or agents) be liable for any claims asserting or based on (a) loss of use of the facility or equipment; lost business, revenues, or profits; loss of goodwill; failure or increased cost of operations; loss, damage or corruption of data; loss resulting from system or service failure, malfunction, incompatibility, or breaches in system security; or (b) any special, consequential, incidental or exemplary damages arising out of or in any way connected with the Equipment or otherwise, including but not limited to damages for lost profits, cost of substitute or replacement equipment, down time, injury to property or any damages or sums paid to third parties, even if Daktronics has been advised of the possibility of such damages. The foregoing limitation of liability shall apply whether any claim is based upon principles of contract, tort or statutory duty, principles of indemnity or contribution, or otherwise.

In no event shall Daktronics be liable for loss, damage, or injury of any kind or nature arising out of or in connection with this Warranty in excess of the Purchase Price of the Equipment. The End User’s remedy in any dispute under this Warranty shall be ultimately limited to the Purchase Price of the Equipment to the extent the Purchase Price has been paid.

4. Assignment of Rights

The Warranty contained herein extends only to the End User (which may be the Purchaser) of the Equipment and no attempt to extend the Warranty to any subsequent user-transferee of the Equipment shall be valid or enforceable without the express written consent of Daktronics.

5. Governing Law

The rights and obligations of the parties under this Warranty shall not be governed by the provisions of the United Nations Convention on Contracts for the International Sales of Goods of 1980. The parties consent to the application of the laws of the State of South Dakota to govern, interpret, and enforce each of the parties’ rights, duties, and obligations arising from, or relating in any manner to, the subject matter of this Warranty, without regard to conflict of law principles.

6. Availability of Extended Service Agreement

For End User’s protection, in addition to that afforded by the warranties set forth herein, End User may purchase extended warranty services to cover the Equipment. The Extended Service Agreement, available from Daktronics, provides for electronic parts repair and/or on-site labor for an extended period from the date of expiration of this warranty. Alternatively, an Extended Service Agreement may be purchased in conjunction with this Warranty for extended additional services. For further information, contact Daktronics Customer Service at 1-800-DAKTRONICS (1-800-325-8766).
