A 32-character liquid crystal display (LCD) prompts the operator and provides vital feedback. Two lines of 16 characters provide easy viewing of game in progress information. The LCD is backlit with LEDs to allow for readability in dark areas as well as bright sunlight.

- Viewing area: 3.89" W x 0.94" H (99 mm, 24 mm)
- Characters: 0.189" W x 0.378" H (4.8 mm, 9.6 mm)

**CONSTRUCTION**
Heavy-duty aluminum case is the toughest line of defense against drops, static electricity, and high/low temperatures. The console’s “snap-action” keyboard is sealed, making it resistant to moisture and spills. An internal beeper helps to indicate a completed keystroke.

**SPORT MODES**
Interchangeable sport inserts allow a single console to work for a wide variety of indoor sports. Sport inserts reduce the confusion of having multiple functions on individual keys. On most inserts, HOME keys are color-coded green and GUEST keys are red for quick identification.

**NON-VOLATILE MEMORY**
The most current information is automatically stored on a memory chip without the need for a battery, should there be a loss of power. The memory cannot be erased and is only overwritten once new information is entered.

**PRODUCT SAFETY APPROVAL**
ETL listed, tested to CSA standards and CE labeled; FCC approved

**OPERATING TEMPERATURES**
32° to 130° Fahrenheit (0° to 54° Celsius)

**GENERAL INFORMATION**
Console can control multiple scoreboards and stat panels, display tenth-of-a-second times, and features Time of Day and Segment Timer modes. Console is static electricity resistant to 20,000 volts. Specifications and pricing are subject to change without notice.
