The Lane Module IV is used when connecting touchpads or push buttons for an on-deck cabling system. Module connections are color-coded to assist in making proper connection to touchpads and push buttons. The timing harness includes one lane module per lane plus an extension module back to the timing console.

**CONSTRUCTION**
The lane module housing is durable, molded, ABS plastic.

**OPERATING TEMPERATURES**
32° to 122° Fahrenheit (0° to 50° Celsius)

**GENERAL INFORMATION**
Lane modules are to be positioned out of the way of swimmers and not directly submerged in water. Silicon lubricant is to be used every time the system is set up and taken down to protect the jacks and plugs.
