

SOFTWARE INTEGRATION

EXPERIENCE AND EASE OF USE

Have you been considering a third-party integration option for your Daktronics equipment, but aren't sure what to do? Take heart, we're here to help.

With over 50 years of experience, Daktronics offers an easy way to integrate with an alternate software provider. We've worked with numerous vendors, so rest assured you'll be covered. We'll take good care of you with our simple, user-friendly process. Are you ready? Follow the basic steps below and you're done.

PROCESS TIMELINE

APPROVAL

Customer approves Daktronics to work with 3rd party software partner.

SITE REVIEW

Daktronics reviews all sites for compatibility. Older sites may require additional time for conversion.

SCHEDULING

Scheduling is coordinated between Daktronics, customer and 3rd party software partner.

PREPARATION

Daktronics prepares our system to accept 3rd party software.

NOTIFICATION

Daktronics notifies 3rd party software partner that the system is ready for them to install and finish conversion.

- › Daktronics software is completely removed when 3rd party software is added.
- › The 3rd party provider is responsible for software diagnostics. Daktronics diagnostics does not monitor 3rd party software.
