1 Introduction

This manual explains the operation of All Sport® 5000 series control consoles. For additional information regarding safety, installation, operation, or service, refer to the telephone numbers listed in **Daktronics Exchange and Repair & Return Programs (p.3)**.

Important Safeguards

- **Read and understand all instructions, both general and for specific sports.**
- **Always turn off and/or unplug the control equipment when it is not in use. Never yank the power cord to pull the plug from the outlet. Grasp the plug and pull to disconnect.**
- **Do not drop the control console or allow it to get wet.**
- **This device shall not be exposed to dripping or splashing, and no objects filled with liquid shall be placed upon it.**

WARNING! To reduce the risk of fire or electric shock, do not expose this device to rain or moisture.

- **Console may include internal battery backup, or external battery pack.**

CAUTION! DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE.

WARNING! Do not expose batteries to excessive heat, such as direct sunlight or fire.

- **Do not let the power cord touch hot surfaces or hang over the edge of a table that would damage or cut the cord.**
- **If an extension cord is necessary, use a three-pronged, polarized cord. Arrange the cord with care so that it will not be tripped over or pulled out.**
- **Before using an extension cord, inspect the cable thoroughly and verify its compliance with local electric codes.**
- **Do not disassemble control equipment or electronic controls of the display; failure to follow this safeguard will make the warranty null and void.**
- **Inspect console for shipping damage such as rattles and dents, and verify that all equipment is included as itemized on the packing slip. Immediately report any problems to Daktronics; save all packing materials if exchange is necessary.**

All Sport consoles receive external power through a standard 8' (2.44 m) long three-pronged power cord plugged into a 120 or 240 VAC grounded outlet. The outlet shall be installed near the console and easily accessible. Contact Daktronics for information on running an All Sport console via optional battery power pack.

Note: All Sport consoles feature an internal time delay 1/8 amp, 250 V fuse for 120 VAC models or 1/16 amp, 250 V fuse for 240 VAC models. In the unlikely event the fuse needs to be replaced, contact Daktronics Customer Service.

Specifications Label

Power specifications as well as product assembly information can be found on the rear of the console. Refer to **Figure 1**.

Figure 1: Specifications Labels

When calling Daktronics customer service, please have the assembly number and the date manufactured available to ensure the request is serviced as quickly as possible.

Daktronics Exchange and Repair & Return Programs

Exchange Program

The Daktronics Exchange Program is a service for quickly replacing key components in need of repair. If a component fails, Daktronics sends a replacement part to the customer who, in turn, returns the failed component to Daktronics. This decreases equipment downtime. Customers who follow the program guidelines explained below will receive this service.

Before contacting Daktronics, identify these important numbers:

Assembly Number: _____

Job/Contract Number: _____

Date Manufactured/Installed: _____

Daktronics Customer ID Number: _____

To participate in the Exchange Program, follow these steps:

1. Call Daktronics Customer Service.

United States & Canada: 1-800-DAK-TRON (325-8766)

Outside the U.S. & Canada: +1-605-275-1040

2. When the new exchange part is received, mail the old part to Daktronics.

If the replacement part fixes the problem, send in the problem part being replaced.

- a. Package the old part in the same shipping materials in which the replacement part arrived.
- b. Fill out and attach the enclosed UPS shipping document.
- c. Ship the part to Daktronics.

3. The defective or unused parts must be returned to Daktronics within 5 weeks of initial order shipment.

If any part is not returned within five (5) weeks, a non-refundable invoice will be presented to the customer for the costs of replenishing the exchange parts inventory with a new part. Daktronics reserves the right to refuse parts that have been damaged due to acts of nature or causes other than normal wear and tear.

Repair & Return Program

For items not subject to exchange, Daktronics offers a Repair & Return Program. To send a part for repair, follow these steps:

This expedites repair of the part.

3. Package and pad the item carefully to prevent damage during shipment.

Electronic components, such as printed circuit boards, should be placed in an antistatic bag before boxing. Daktronics does not recommend using packing peanuts when shipping.

4. Enclose:

Daktronics Warranty & Limitation of Liability

The Daktronics Warranty & Limitation of Liability is located at the end of this manual. The Warranty is independent of Extended Service agreements and is the authority in matters of service, repair, and display operation.

2 Basic Operation

Console Operation

The console face consists of a 2-line by 16-character liquid crystal display (LCD), number/menu keypads, horn/clock controls with LED status indicators, and an area for a sport-specific insert. Refer to **Figure 3** to locate these components on the control console face.

Figure 3: All Sport 5000 Layout

In most cases, the top line of the LCD shows the main clock time, direction the clock is counting, and when the main horn is sounding, while the bottom line typically shows the HOME and GUEST team scores.

The standard fixed keys and functions on the right side of the console are explained in **Standard Keys (p.7)**. All of the keys that pertain to a specific sport code insert are explained in detail in their respective sport section.

In addition, Quick References and Menu Flowcharts for the Standard Keys and many of the more common individual sports are provided in **Appendix D**.

Throughout this manual, the names or letters of keys on the keypad are enclosed in angle brackets (such as <ENTER>).

Sport inserts allow one console to control multiple sports. Select the proper insert from the chart below and slide it into the insert opening on the left side of the console until it stops. To remove a sport insert, pull on the tab that extends from the left side of the console.

If an insert is lost or damaged, a printed copy of the insert drawing from **Appendix B** may be used until a replacement can be ordered. Print this page (if viewing digital copy) and write the code number in the following table for all applicable sports.

If the code number for a scoreboard is unknown, refer to **Appendix C**. If the model number of a scoreboard is unknown, refer to the documentation provided with the scoreboard.

A sport insert identifies the keys required for normal operation of a specific sport. In most cases, pressing a key immediately changes the scoreboard. Keys that require entry of additional information are marked by a dot. This additional information is usually a number followed by the **<ENTER>** key.

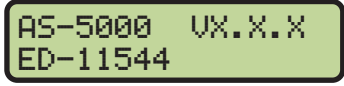

Keys with arrows activate an indicator (possession, bonus, etc.) on the scoreboard. The direction of the arrow selects the appropriate team (home or guest).

Some keys are labeled **+1**, **+2**, or **+3**. By pressing one of these keys once, the corresponding field on the scoreboard (such as score or period) "increments", or increases, by the amount printed on the key. A key with **-1** "decrements", or decreases, by one.

On most inserts, certain keys have been grouped together under the heading **Home** or **Guest**. These keys are **team** keys and work the same for both teams. They affect the statistics only for that one team. Keys not under one of these headings are **game** keys. They are general keys for the progress of the game (such as period or quarter). Other keys may be grouped in a similar way to emphasize that they work together.

Start Up

Use the switch on the back of the console to turn it on, then follow the LCD screens:

Display	Action
	<p>The console performs a self-test when it is powered on. During the self-test, a message displays the version of the standard software loaded in the console.</p> <p>V = version number and revision number ED = standard software number</p>
 <p>NNNN = last code selected</p>	<p>When the self-test completes, a prompt displays the code number for the last game played. This is useful when power to the console is lost during a game.</p> <p>Press <YES> to resume the last game stored in memory. The console is now ready for game operation.</p> <p>Press <NO> to start a new game or change to a different sport. The console will prompt for a new code number.</p>
 <p>NNNN = current code</p>	<p>The SELECT CODE prompt lets the operator accept the last code selected (shown on the second line) or enter a new code.</p> <p>To accept the code shown, press <ENTER>.</p> <p>To select a new sport code:</p> <ol style="list-style-type: none"> 1. Standard Keys

Start

<START> is used to start the main clock. The green LED on the **<START>** key is on while the main clock is running.

Stop

<STOP> is used to stop the main clock. The green LED on the **<START>** key is off while the main clock is stopped.

Enter/Yes

The **<ENTER/YES*>** key has two functions:

- Completes an action. As a reminder to press this key, an asterisk appears on the LCD.
- Serves as **<YES>** for input prompts (**Y**).

Clear/No

The **<CLEAR/NO>** key has two functions:

- Clears the LCD of numerical information.
- Serves as **<NO>** for input prompts (**N**).

The **<CLEAR/NO>** key also acts as an escape during data entry. The number of key presses to escape depends on the step in the entry process (flashing asterisk or not).

Example 1: The operator presses the **<SET MAIN CLOCK>** key to adjust the game time.

- If no number key has been pressed yet, press the **<CLEAR/NO>** key once to escape.
- If any number key has been pressed, the **<CLEAR/NO>** key must be pressed twice to escape; the first press blanks the data on the LCD, and the second press escapes.

Example 2: The operator presses **<EDIT>** followed by a **<SCORE>** key to change the score.

- The **<CLEAR/NO>** key must always be pressed twice to escape.

Edit

Press the **<EDIT>** key followed by one of the increment or decrement keys for the desired field on the scoreboard to modify. Then simply enter the new value to display and press **<ENTER>** to accept.

Menu

Press **<MENU>** to access general and sport-specific options. Use the up and down arrow keys to scroll through the menu list. Press **<MENU>** again at any time to return to the game in progress. Refer to **Menu (p.15)** for more information.

Manual Horn

Press <HORN> to sound the main horn. The horn sounds as long as the key is pressed.

Remote Start/Stop Controls

The All Sport 5000 console lets additional operators control timing functions remotely using the Main Clock Start/Stop switch and the Shot Clock Start/Stop switch.

Figure 4: Remote Start/Stop Switches

Main Clock Control

The Main Clock Start/Stop switch plugs into **J4** on the back of the console (**Figure 4**). This unit has a rocker switch for clock start/stop and a button for horn. The horn button sounds the horn as long as the button is pressed.

Shot Clock Control

The Shot Clock Start/Stop switch plugs into **J7** on the back of the console (**Figure 4**). This unit has a rocker switch for Start/Stop and reset button(s). When a reset button is pressed, the shot clock timer is changed to the reset value and stops the timer from decrementing. The shot clock timer restarts when the reset button is released. In FIBA mode for basketball, holding either reset button will blank the shot clock. In independent mode, the switch starts and stops the shot clock timer when pushed, but does not stop when the main clock is stopped. When in synchronized mode, the shot clock timer will stop and start with the main clock switches only if it is running in the beginning.

Refer to **Section 6: Clock Console Operation (p.43)**, **Section 7: Basketball Operation (p.45)**, and/or **Water Polo Operation (p.137)** for sport-specific information about shot clock configurations.

Setting Radio Channels

Reference Drawings:

- Channel Selection; Multiple Broadcast Group, Gen IV DWG-203113
- Installation Details, Gen VI Channel Selection Guide DWG-1109870

The radio receiver units used in Daktronics scoreboards have a channel (CHAN) switch that can be set from 1–8. The receivers also have a broadcast group (BCAST) setting. The broadcast group defines a group of radio receivers that “listen” to the channel selected on the channel switch as well as “listen” for data sent out on their broadcast channel.

Note: The number of available broadcast groups varies depending on the generation and region of radio receiver: Gen V receivers have 1–4, while Gen VI receivers have 1–8. Gen VI units sold internationally (Europe/Asia) only have groups 1–4.

Each radio receiver will accept data sent from the broadcast channel of its respective broadcast group, as well as data sent from the “Master Broadcast” channel. This is selected when the console is set to BCAST 0 and CHAN 00.

In this type of system, the receiver unit at the scoreboard must have the channel switch set to a specific channel. The operator must know which channel is selected in the scoreboard. The operator must then enter the specific channel when prompted during console startup.

To determine the settings of a scoreboard, first power it down and shut off any radio-equipped consoles in the area. Next, power the scoreboard back up and watch for the radio settings. The settings will appear as “bX CY” where X is the current broadcast group, and Y is the current channel.

The settings are typically displayed in the clock digits or Home and Guest score digits, depending on the scoreboard model. Refer to **Figure 5**.

The console automatically detects when a radio transmitter is installed and will prompt the operator for transmitter settings after a valid sport code is entered.

Figure 5: Radio Settings in Clock or Score Digits

Note: If interference from a nearby Daktronics system is suspected, press <CLEAR> at the “RADIO SETTINGS” prompt to change the channel number.

There are three different radio scenarios that can be accommodated: a single controller system, a multiple controller system with a single broadcast group, and a multiple controller system with multiple broadcast groups. These scenarios are described on the following pages.

Single Controller System

In a single controller system (**Figure 6**), all radio receivers and all scoreboards receive signal from the same console. The default channel and broadcast group settings on the receiver are not typically modified. An example of this type of system is a football field with a scoreboard in one or both end zones displaying the same information.

Figure 6: Single Control Console

Typically all single controller systems will use the default setting BCAST = 1, CHAN = 1. All radio receivers in the system must be set to the same values.

Display	Action
<p>The LCD will toggle between these 2 screens:</p> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>RADIO SETTINGS BCAST X CHAN YY</p> </div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>ENTER TO ACCEPT CLEAR TO MODIFY</p> </div> <div style="border: 1px solid black; padding: 5px;"> <p>BCAST GROUP X* RADIO CHAN YY</p> </div> <p>X = broadcast group number YY = channel number</p>	<p>The LCD shows the current radio settings along with a prompt to accept or modify these values.</p> <p>If the radio settings are correct press <ENTER>.</p> <p>If these values are incorrect, press <CLEAR>, and the LCD at bottom left is shown, allowing edit of the channel or broadcast group setting.</p> <p>Broadcast Group Setting [1] Use this setting for all single controller systems. Use the number keys to edit this value and press <ENTER> to accept. The asterisk will move to the channel setting.</p> <p>Channel Setting [1-8] Edit the channel number to the desired value and press <ENTER> to accept. The CHAN switch on the receiver must match this value.</p>

Multiple Controller System with Single Broadcast Group

In a multiple controller system with a single broadcast group (**Figure 7**), there may be one console for each scoreboard and/or one master controller that can run every scoreboard at one time or take control of a specific scoreboard. An example of this type of system is a softball complex with individual scoreboards on several different fields.

Figure 7: Single Broadcast Group

Multiple controller systems typically use Broadcast 1 and Channel 1 for the first controller and Channels 2-8 for all remaining controllers. All radio receivers in the system must be set to Broadcast 1 (BCAST 1).

Display	Action
<p>The LCD will toggle between these 2 screens:</p> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>RADIO SETTINGS BCAST X CHAN YY</p> </div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>ENTER TO ACCEPT CLEAR TO MODIFY</p> </div> <div style="border: 1px solid black; padding: 5px;"> <p>BCAST GROUP X* RADIO CHAN YY</p> </div> <p>X = broadcast group number YY = channel number</p>	<p>The LCD shows the current radio settings along with a prompt to accept or modify these values.</p> <p>If the radio settings are correct press <ENTER>.</p> <p>If these values are incorrect, press <CLEAR>, and the LCD at bottom left is shown, allowing edit of the channel or broadcast group setting.</p> <p>Broadcast Group Setting [1] Use this setting for all multiple controllers with single broadcast group setups. Use the number keys to edit this value and press <ENTER> to accept. The asterisk will move to the channel setting.</p> <p>Channel Setting [1-8] Edit the channel number to the desired value and press <ENTER> to accept. The CHAN switch on the receiver must match this value.</p>

Multiple Controller with Multiple Broadcast Groups

In a multiple controller system with multiple broadcast groups (**Figure 8**), there are many consoles that control multiple scoreboards and/or scoreboard groups. The radio receiver inside the scoreboard is set to broadcast group 1-4 (Gen V) or 1-8 (Gen VI). By changing the console settings to the specific broadcast group address, a single console can control all scoreboards or specific groups of scoreboards. One example of this scenario is split court operation in basketball installations, where scoreboards are used to score multiple games at once, but can be grouped together to show one game if necessary.

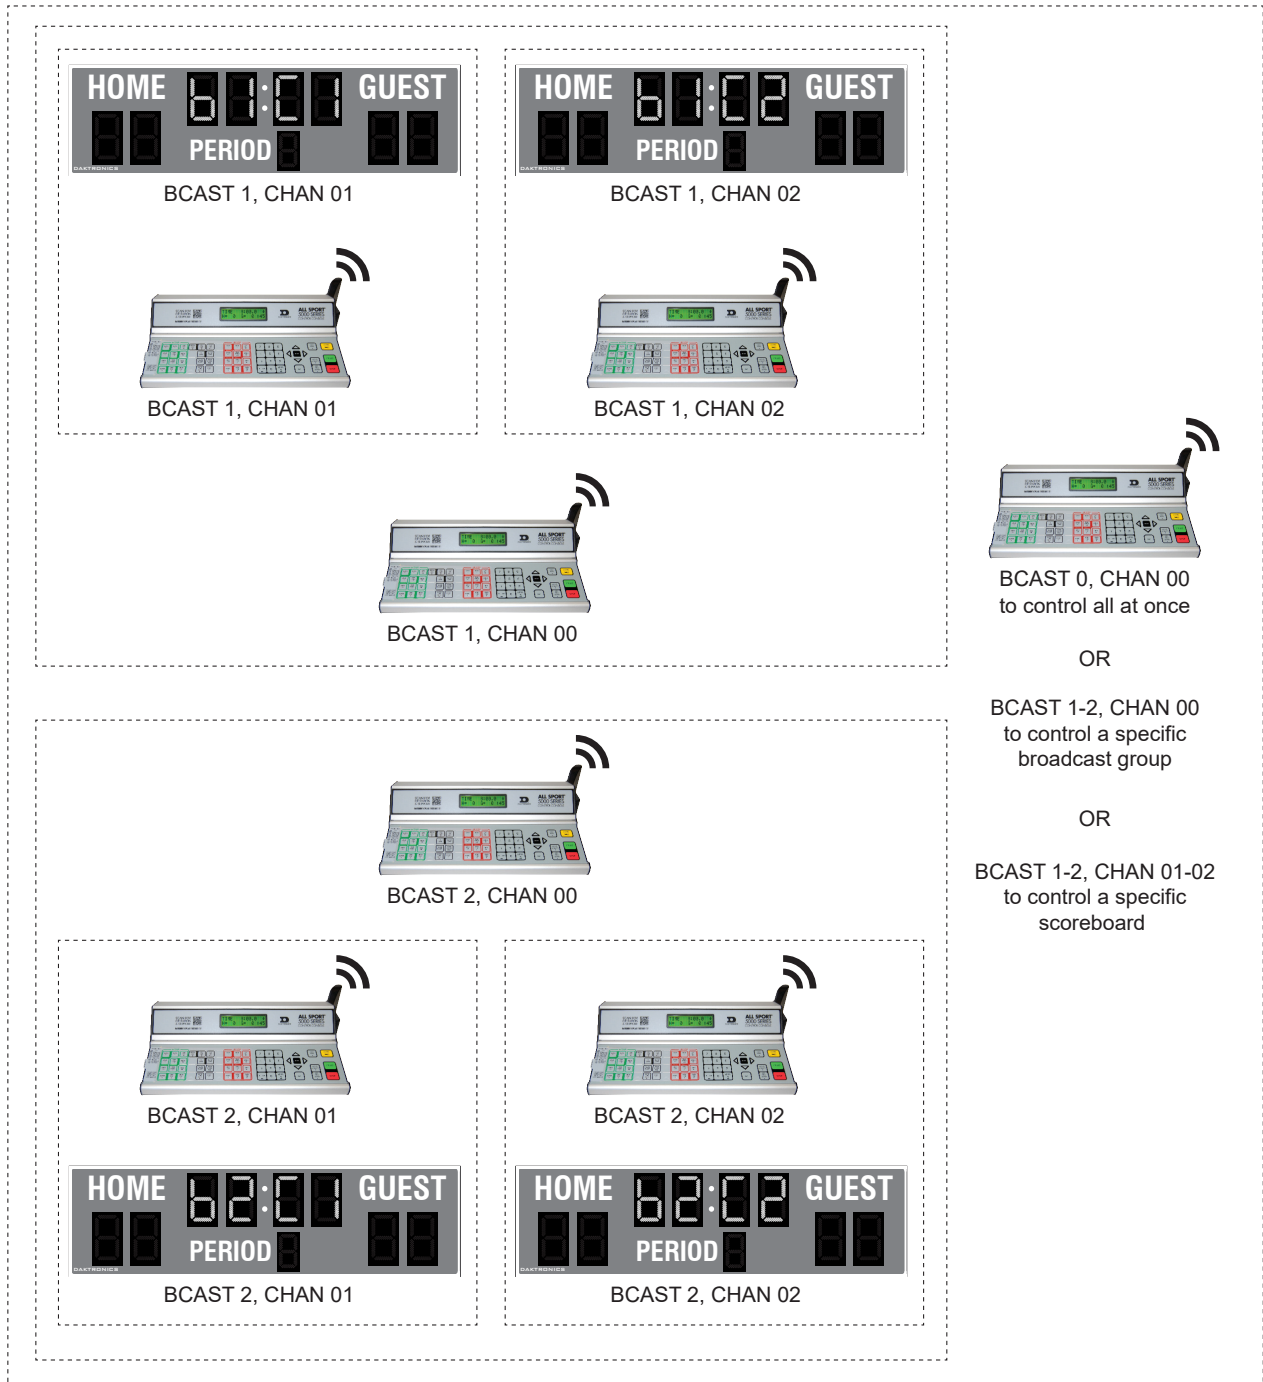

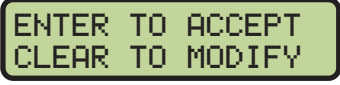

Figure 8: Multiple Broadcast Group

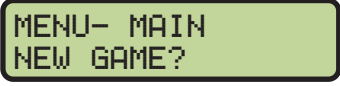

Typically, all multiple controller systems will use BCAST 1, CHAN 1 for the first controller in Broadcast Group 1 and BCAST 2, CHAN 1 for the first controller in Broadcast Group 2. All other consoles in a group are added sequentially.

Switch Output

The All Sport 5000 console has a relay switch that can be used to control external devices. The switch can be configured to operate under different clock or horn conditions. The default setting is **1-CLOCK= 0**.

1. Press the number key (<0>, <1>, <2>, <3>) as a shortcut or use the left and right arrow keys to select the desired setting.
2. Press <YES> to select the new setting, or press <NO> to leave the switch setting as is.

The possible settings for the switch output are displayed below:

Display	Action
<p>N = current setting</p>	The switch remains open at all times and any external devices are disabled.
<p>N = current setting</p>	In count down mode, the switch closes when the main clock reaches zero and stays closed until a nonzero value is entered. In count up mode, the switch closes when the main clock reaches the proper period, break, or overtime length and opens when any other value is entered.
<p>N = current setting</p>	The switch closes when the main clock is stopped and opens when the main clock is running. External devices are disabled when the main clock is running.
<p>N = current setting</p>	The switch closes when the main horn sounds. This could be when Auto Horn is enabled and the main clock reaches zero or when <HORN> is pressed.

General Multi-Purpose Timer

There is no insert for the Multi-Purpose Timer codes. Code 99 is used to operate the multi-purpose timer.

The Multi-Purpose Timer is a general timer used for 2-, 4-, and 6-digit time displays. The timer will count up or down through hours, minutes, and seconds. The information will shift on the 2- and 4-digit displays to show the most significant time values as the time changes. The Multi-Purpose Timer code is also used as a Time-of-Day code by accessing the Time of Day Menu through the Menu key. The Segment Timer may also be accessed using the Menu key.

Standard Keys

The keys that are used by the multi-purpose timer are <START>, <STOP>, <SET MAIN CLOCK>, <COUNT UP/DOWN>, <AUTO HORN>, <MANUAL HORN> and <MENU>. The key functions are explained in more detail in **Standard Keys (p.7)**.

Segment Timer

Refer to **Section 3: Segment Timer Operation (p.22)** for details on accessing and operating the segment timer function.

Team Name Entry

Certain scoreboards may be equipped with Team Name Message Centers (TNMCs), LED matrix displays that show team names, abbreviations, or short messages.

The team name entry function is typically accessed by pressing the **<MENU>** key and navigating to the HOME or GUEST ROSTER submenu (refer to an individual sport section for more information).

The TEAM NAME insert (LL-2441) is used to enter the TNMC settings. For newer consoles, the Team Name insert is printed directly on the keypad; for older consoles, it will be necessary to swap the sport insert with a separate insert. The TEAM NAME insert has the following sections for controlling the appearance of the display:

WIDTH

Select the width (in pixels) of the TNMC from 16, 32, 48 or 64 columns. The default width is 48 columns long.

HEIGHT

Select the height (in pixels) of the TNMC from 7 or 8 rows. The default height is 8 rows high.

FONT

Select a Single Stroke or a Double Stroke (bold) font. The default font is single stroke. Each TNMC on a scoreboard (Home & Guest) may use different font settings to fit varying team name lengths.

The tables below show the width (in pixels) of every character for each font setting:

3 Segment Timer Operation

Sport Insert: LL-2475 (Code 100 is for the dedicated Segment Timer)

The Sport Insert drawing is located in **Appendix B**. The Quick Reference is located in **Appendix D**.

Reference Drawings:

Insert, Segment Timer **DWG-129357**

Refer to **Section 2: Basic Operation (p.5)** for information on how to start up the console and use the sport insert.

If an insert is lost or damaged, a copy of the insert drawing can be used until a replacement arrives.

If the code number for a scoreboard is unknown, refer to **Appendix C**. If the scoreboard model number is unknown, refer to the documentation provided with the scoreboard.

Segment Timer Overview

The segment timer is a multi-function timing system and has multiple purposes. Operation of the segment timer is determined by 99 segments of pre-programmed length. The segment timer will count down starting at the segment number that is set as **First Segment**. When the first segment is completed, the timer will count the preset **Interval Time** and move on to the next segment. The timer will continue counting segments until the segment number that is set as **Last Segment** is complete. It then will reset to the segment saved as the **First Segment** and will either begin counting down or wait for the **<START>** key to be pressed depending on the **<AUTO STOP>** setting. Refer to **Auto Stop (p.25)** to set the segment-stopping feature.

The **First Segment** and **Last Segment** values can be used to set up specific practice sessions. For example, the practice session for one sport could be programmed for 5 minute segments on segments 1-10 while another might use 10 minute segments on 11-20. Set the **First Segment** and **Last Segment** values to the desired segment numbers for the session and the console will count down each of the segments in order. It may also be set to either stop on the last segment or loop back to the first segment again based on the **<AUTO STOP>** setting.

The segment values will be saved when the console is turned off and will be the same values regardless of the sport that was used to access the segment timer.

Accessing Segment Timer

Turn on the console. Enter the sport code used for the scoreboard in use and press **<ENTER>**. A list of sport codes can be found in **Appendix C**.

The segment timer program is accessed through the main menu of each individual sport.

Accessing 2-Digit or 6-Digit Display Segment Timer

This code is only used for the two-digit or six-digit displays designed exclusively for segment timing. Enter code **100** after turning on the console to access the exclusive segment timer program. For scoreboards, enter the correct scoreboard code and use <MENU> to access the segment timer function.

General Pitch & Speed Information

The pitch and speed program interfaces with a JUGS® or STALKER® radar gun to provide pitch and speed information. The pitch type and speed can be displayed on a matrix display, while only the speed may be displayed on a fixed digit display.

For more information about radar gun setup, refer to the **Radar Gun Speed of Pitch Systems Configuration Manual (ED-12224)** or the **Speed of Pitch Systems Setup Manual (DD3394576)**, both available online at www.daktronics.com/manuals.

Pitch & Speed Keys

Pitch Keys

Note: In Auto mode, the pitch keys are not used.

The keys on the left side of the keypad are used to select the type of pitch for manual display mode. In manual display mode, the console waits to send the received pitch speed until a pitch type key is pressed. Once a pitch type is selected, the pitch data is updated on the display and sent as Real-Time Data (RTD).

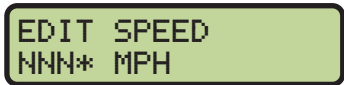

Display Speed

<DISPLAY SPEED> is used in manual mode to send the speed to the display as speed only (blank frame).

Blank Time

ADVANCED SETUP CONFIGURATIONS: INDEPENDENT SCOREBOARDS, GROUPED SCOREBOARDS, OR OVERALL MASTER CONTROLLED SCOREBOARDS.

A TYPICAL SCENARIO FOR THIS SETUP IS A BASKETBALL COURT THAT CAN BE RUN IN FULL COURT AND HALF COURT SETUP. THE INFORMATION BELOW WILL APPLY TO ANY SET OF SCOREBOARDS THAT NEED TO HAVE MULTIPLE CONTROL OPTIONS.

EACH SCOREBOARD RADIO RECEIVER WILL NEED TO BE SETUP; THERE ARE 4 BROADCAST GROUPS THAT CAN BE USED, BROADCAST 1 AND 3 CAN USE UP TO 8 CHANNELS (1-8), BROADCAST 2 AND 4 CAN USE UP TO 4 CHANNELS (1-4). J4 AND J5 ARE USED TO SELECT THE BROADCAST GROUP. J4 IS USED TO SELECT BROADCAST GROUPS 1 AND 2. J5 IS USED TO SELECT BROADCAST GROUP 3 AND 4. USE THE ROTARY DIAL ON THE RADIO TO SELECT THE CHANNEL. REFER TO DRAWING 1110-R01A-203543 OR 1110-R01A-203542 FOR BROADCAST AND CHANNEL SETTING INSTRUCTIONS.

FOR ALL SCOREBOARDS IN ONE BROADCAST GROUP, SET J4 OR J5 OF THE RADIO TO THE DESIRED BROADCAST GROUP (1-4) AND SET THE CHANNEL NUMBER TO THE CORRESPONDING SCOREBOARD CHANNEL. IT MAY BE NECESSARY TO CHANGE THE CHANNEL ON THE SCOREBOARD, IF A CHANNEL OTHER THAN WHAT IS SET IS NEEDED (REFER TO DRAWING 1110-R01A-203543 OR 1110-R01A-203542 FOR SCOREBOARD CHANNEL SETTING INSTRUCTIONS). EACH RADIO WITHIN THE SAME BROADCAST GROUP MUST BE SET TO A DIFFERENT CHANNEL NUMBER FROM 1-8 FOR GROUPS 1 AND 3 (CHANNELS 1-4 FOR BROADCAST GROUPS 2 AND 4).

MASTER CONTROL

TO RUN ALL SCOREBOARDS AT ONCE; SET THE CONTROL CONSOLE TO BCAST = 0, CHANNEL = 00.

GROUP CONTROL

TO RUN ALL SCOREBOARDS IN BROADCAST GROUP 1 AT ONCE SET THE CONTROL CONSOLE TO BCAST = 1, CHANNEL = 00
TO RUN ALL SCOREBOARDS IN BROADCAST GROUP 2 AT ONCE SET THE CONTROL CONSOLE TO BCAST = 2, CHANNEL = 00
TO RUN ALL SCOREBOARDS IN BROADCAST GROUP 3 AT ONCE SET THE CONTROL CONSOLE TO BCAST = 3, CHANNEL = 00
TO RUN ALL SCOREBOARDS IN BROADCAST GROUP 4 AT ONCE SET THE CONTROL CONSOLE TO BCAST = 4, CHANNEL = 00

INDEPENDENT CONTROL

TO RUN EACH SCOREBOARD INDEPENDENTLY, SET THE CONTROL CONSOLE TO THE APPROPRIATE BROADCAST GROUP (BCAST = 1-4), AND THEN SET THE CHANNEL TO THE SCOREBOARD CHANNEL. EX. TO RUN SCOREBOARD #3 IN THE SETUP ILLUSTRATED ABOVE, SET THE CONTROL CONSOLE TO BCAST = 3, CHANNEL = 01.

THIS IS A STEP BY STEP EXPLANATION USING GEOMETRY TO CALCULATE THE "SPEED ADJUST" VALUE IN THE MENU OF THE ALL SPORT PITCH AND SPEED PROGRAM, CODE 5500.

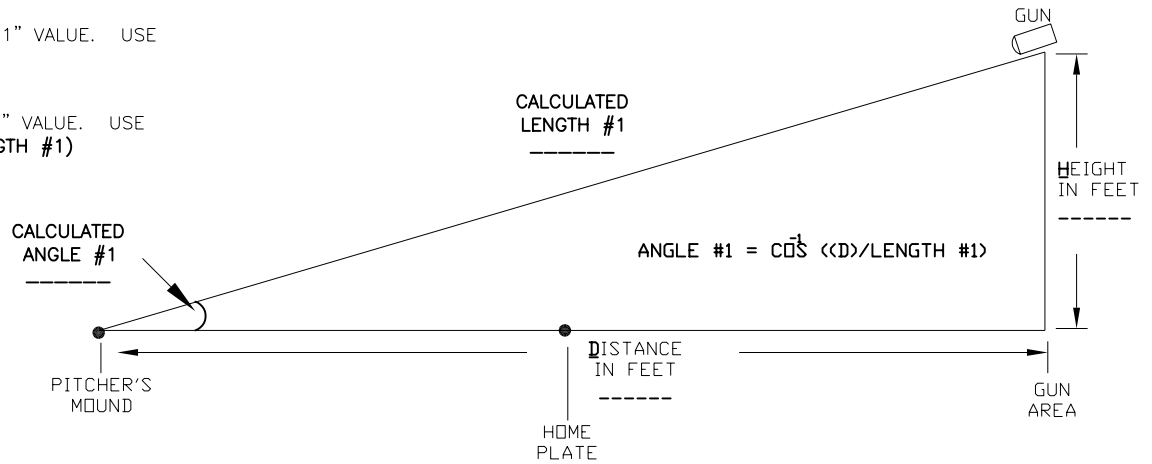

A CALCULATOR WITH ABILITY TO DO SIN, COS, TAN IS REQUIRED.
DO ALL CALCULATIONS TO .XXXX VALUES.

STEP 1.
MEASURE, IN FEET, DISTANCE FROM PITCHER'S MOUND STRAIGHT BACK, PAST HOME PLATE TO THE AREA WHERE GUN IS. WRITE YOUR MEASUREMENT ON THE _____ PROVIDED ON THE TRIANGLE PICTURE BELOW.

STEP 2.
MEASURE, IN FEET, HOW HIGH THE GUN IS OFF THE GROUND. WRITE YOUR MEASUREMENT ON THE _____ PROVIDED ON THE TRIANGLE PICTURE BELOW.

STEP 3.
CALCULATE THE "LENGTH #1" VALUE. USE
 $LENGTH \#1 = \sqrt{D^2 + H^2}$

STEP 4.
CALCULATE THE "ANGLE #1" VALUE. USE
 $ANGLE \#1 = \cos^{-1}(D/LENGTH \#1)$

STEP 5.
MEASURE, IN FEET, HOW FAR OVER THE GUN IS "OFFSET" FROM HOME PLATE. WRITE YOUR MEASUREMENT ON THE _____ PROVIDED ON THE TRIANGLE PICTURE BELOW.

STEP 6.
COPY THE "LENGTH #1" VALUE WHICH FOUND ABOVE, TO THIS PICTURE. YOU WILL REUSE THAT NUMBER.

STEP 7.
CALCULATE THE "ANGLE #2" VALUE. USE
 $ANGLE \#2 = \tan^{-1}(O/LENGTH \#1)$

STEP 8.
ADD CALCULATED ANGLE #1 TO CALCULATED ANGLE #2.
ENTER VALUE HERE _____

STEP 7.
CALCULATE SPEED ADJUST VALUE. USE
 $SPEED \ ADJUST \ VALUE = \cos(ANGLE \#1 + ANGLE \#2)$.

CALCULATIONS SHOWN WILL NOT BE 100% EXACT.
ADDITIONAL ADJUSTMENTS CAN BE MADE AS REQUIRED.
*** THE LOWER THE NUMBER, THE FASTER SPEED THE GUN READS. ALL ADJUSTMENTS SHOULD BE DONE AT .00XX LEVEL. ***

Scoreboard Driver Bootload Update Procedure.....**ED-18728**

This page intentionally left blank.

Some scoreboard drivers feature a “bootloader” that allows firmware updates to be performed in the field using a computer and an All Sport 5000 or an All Sport 5500 (ColorSmart) control console. The console acts as a signal converter between the computer and the scoreboard network.

Requirements

Software Versions

- The All Sport 5000 must have software version 4.1.5 or later.
- The All Sport 5500 must have software version 1.0.5 or later.
- The 16 column MultiCast driver (0P-1388-0100) must have software version 1.3 or later.
- The Gyrus driver (0A-1782-0100) must have software version 1.3 or later. Also note:
 - Gyrus driver address must be non-zero.
 - Gyrus driver will not bootload if running Power-On Diagnostics (FF).
 - Gyrus drivers must be running from Multi-Drop protocol and will not bootload while running in any of the other following protocols:
 - Multi-Line
 - Colorado Timing Systems
 - Omega

Equipment

- Computer with internet access and a 9-pin serial port [or USB-to-Serial adaptor (part # A-2221)]
- 9-pin to 9-pin serial cable (part # W-1267) or 9-pin to 25-pin serial cable (part # W-1249)

Instructions

1. Make sure that the All Sport console has a version of firmware that supports bootloading (see **Requirements** above). If it does not, contact customer service to request an All Sport PROM update.
2. Make sure the scoreboard driver has a version of firmware that supports bootloading by cycling the scoreboard power and observing the power up sequence. An “rx.x” message will be displayed, where “x.x” is the version number. If the version number is under 1.3, the drivers will have to be updated with a programming board or exchanged for newer versions.
3. Download the DakLoader program and the Field Update file:
 - a. On a computer with internet access, open a web browser and go to:
http://dakfiles.daktronics.com/downloads/Sports_Products/Bootloader/
 - b. Click on the “DakLoader2.exe” file, and **Save** it to the Desktop.
 - c. Click on the specific “Driver Update Files” directory, either “MultiCast” or “Gyrus”.
 - d. Click on the “16 col driver” directory.
 - e. Click on the compressed “.zip” file, and **Save** it to the Desktop as well.
 - **MultiCast Drivers:** “ED-16327_Mcast16.zip”
 - **Gyrus Drivers:** “DD-2929930_Gyrus_vX_Y.zip” (X_Y = latest version number)
 - f. Unzip the downloaded file to obtain the “.fud” (**Field UpDate**) file.

NOTE FOR GYRUS DRIVERS:

The proper Field Update File to unzip depends on the firmware of the All Sport 5000 console. Power on the console, and identify the firmware version during boot-up.

- **Version 4.1.5:** Unzip the FUD file in the “AllSport_v4_1_5_compatible” folder.
- **Version 4.1.6+:** Unzip the FUD file in the “AllSport_v4_1_6_plus_compatible” folder.

4. Enter code "0001" into the All Sport console. Remove any sport insert over the console's keypad, and press <T> or <G> to send rotating rows or rotating columns test command to the scoreboard.
5. Connect the computer to the All Sport 5000 or 5500:
 - If the All Sport console has the **J5 COMPUTER PORT** option loaded, connect this port to the computer using a standard 9-pin serial cable.
 - If the All Sport console has the **J6 I/O PORT** option loaded, connect this port to the computer using a 9-pin to 25-pin serial cable.

Note: If the computer does not have a 9-pin serial port, a USB-to-serial adaptor will be required.

6. Open the DakLoader2 program that was saved to the Desktop in **step 3b**.
7. Click on the **Communications** menu, and verify the appropriate **COM#** port is selected:

8. Select **Other AS5500**, and then click the [...] button to browse to the Field Update file that was extracted from the zip file in **step 3f**:

9. Click **Update**. The *Status* window will now show: "Waiting for the update process to start on the AllSport."

10. Start the update process on the All Sport console:

- a. On the All Sport console, press <MENU> and then press <ENTER> to select a New Code. Enter a valid sport code other than 0001.
- b. Press <MENU> again. Use the arrow keys to navigate to "MENU- MAIN ENTER DISPLAY MENU?" and then press <ENTER>.
- c. Use the arrow keys to navigate to "MENU-DISPLAY RUN DOWNLOAD Y/N?" and then press <ENTER>.
- d. The All Sport LCD should immediately show "HEADER RECEIVED WAIT FOR ERASE", and the *Status* window in the DakLoader program should show "Sending field update..."

MENU- MAIN
NEW CODE?

MENU- MAIN ENTER
DISPLAY MENU?

MENU-DISPLAY RUN
DOWNLOAD Y/N?

HEADER RECEIVED
WAIT FOR ERASE

TIMED OUT
RETRY Y/N?

Note: If the process does not start, check the serial cable connection and the COM port selection in the DakLoader program. The All Sport will time out after 20 seconds and allow the process to be tried again.

- e. There will be a delay of a few seconds while the All Sport sends a command to the scoreboard network instructing all drivers to erase their firmware. Both the All Sport and the DakLoader program will then show the progress of the update:

RECEIVING FILE
BLOCK # 0001

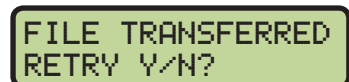

11. Monitor the status of the update on the scoreboard:

- a. Supported drivers will display the status codes in the table below on their first 2 columns (typically the first 2 clock digits or Home/Guest score digits if there is no clock):

Status Code	Meaning
bA	Bootload mode entered, looking for an active communication channel
bB	Communication channel found, waiting for Download Firmware command
bC	Download Firmware command received, erasing memory
bD	Memory erased, receiving new firmware file
bE	Bootload successful, waiting for command to exit bootloader
b1	Command fail: version specified in header is older than current version
b2	Command fail: ED number specified in header doesn't match current ED
b3	Command fail: bad command checksum
b4	Command fail: timeout (<i>Unused</i>)
b5	Flash erase failed
b6	Bad hex record checksum
b7	Unrecognized hex record type
b8	Hex file receive timeout
b9	Hex programming error (<i>Gyrus Driver Only</i>)

- b. When the entire update file has been transmitted, the All Sport will show "FILE TRANSFERRED RETRY Y/N?" and the DakLoader2 program *Status* window will show "Field update complete. Waiting for retry or stop..."

FILE TRANSFERRED
RETRY Y/N?

- If there are any supported drivers on the network that do not show the "bE" status code, press **<ENTER>** on the All Sport console to retry the update. Only those drivers that failed the first attempt will now receive the update.
- If all drivers updated successfully, press **<CLEAR>** on the All Sport console to return to normal operation. The console will indicate to the network that the update process is complete and all drivers will exit the bootload mode.

DO NOT UNPLUG OR POWER OFF THE ALL SPORT UNTIL IT HAS RETURNED TO NORMAL OPERATION!

EXCEPT AS OTHERWISE EXPRESSLY SET FORTH IN THIS WARRANTY, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, DAKTRONICS DISCLAIMS ANY AND ALL OTHER PROMISES, REPRESENTATIONS AND WARRANTIES APPLICABLE TO THE EQUIPMENT AND REPLACES ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ACCURACY OR QUALITY OF DATA. OTHER ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY DAKTRONICS, ITS AGENTS OR EMPLOYEES, SHALL NOT CREATE A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS LIMITED WARRANTY.

THIS LIMITED WARRANTY IS NOT TRANSFERABLE.

The foregoing limitation of liability shall apply whether any claim is based upon principles of contract, tort or statutory duty, principles of indemnity or contribution, or otherwise
- C. In no event shall Daktronics be liable for loss, damage, or injury of any kind or nature arising out of or in connection with this Warranty in excess of the Purchase Price of the Equipment. The End User's remedy in any dispute under this Warranty shall be ultimately limited to the Purchase Price of the Equipment to the extent the Purchase Price has been paid.

The language of the arbitration

DAKTRONICS WARRANTY & LIMITATION OF LIABILITY

shall be English. The place of the arbitration shall be Sioux Falls, SD. A single arbitrator selected by the parties shall preside over the proceeding. The arbitrator shall have the power to grant any provisional or final remedy or relief that it deems appropriate, including conservatory measures and an award of attorneys' fees. The arbitrator shall make its decisions in accordance with applicable law. By agreeing to arbitration, the Parties do not intend to deprive any court of its jurisdiction to issue a pre-arbitral injunction, pre-arbitral attachment, or other order in aid of arbitration proceedings and the enforcement of any award. Without prejudice to such provisional remedies as may be available under the jurisdiction of a court, the arbitrator shall have full authority to grant provisional remedies and to direct the Parties to request that any court modify or vacate any temporary or preliminary relief issued by such court, and to award damages for the failure of any Party to respect the arbitrator's orders to that effect.
