

This guide is designed to help Venus Control Suite (VCS) customers operate the Data Studio Hockey app. Data Studio Hockey is used to manage hockey data feeds through the use of providers and outputs. Playing the games and replays populates game, team, and player stats inside of Data Studio.

Access Data Studio Hockey

1. Log in to **Venus Control Suite**.
2. Select an account.
3. Click **Data Studio Hockey** from the **My Apps** menu. Refer to **Figure 1**.

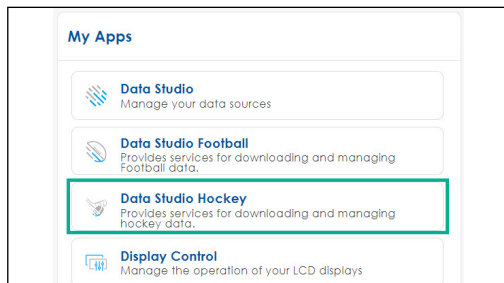

Figure 1: Data Studio Hockey

Providers

Providers are a collection of data distributed by unique organizations composed of games, stats, and replays. Data Studio Hockey will prompt the creation of a **Provider** on the first launch; a **Provider** is required to use the software.

Create a Provider

1. Navigate to **Providers** tab and click **Add New**. Refer to **Figure 2**.
2. Configure the **Provider** as shown in **Figure 3**.
 - a. Enter a **Title** for the provider.
 - b. Select a **Team** from the drop-down menu.
 - c. Click **Save** to finish configuration.

Figure 2: Add New Provider

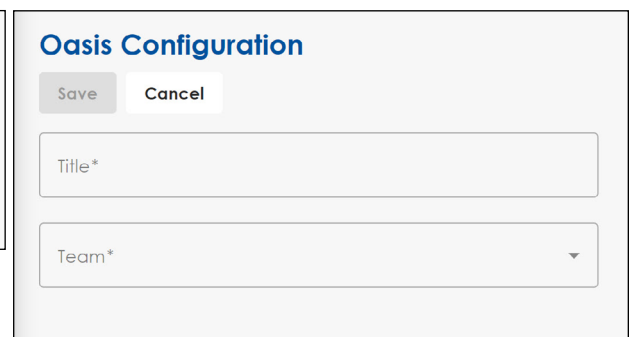

Figure 3: New Provider Configuration

Edit a Provider

1. Select a provider from the **Providers** tab.
2. Edit the **Title** or **Team**.
3. Click **Save** to confirm.

Delete a Provider

1. Select a provider from the **Providers** tab.
2. Click .
3. Click **Confirm** on the popup to delete the provider. Refer to **Figure 4**.

Note: This process cannot be undone.

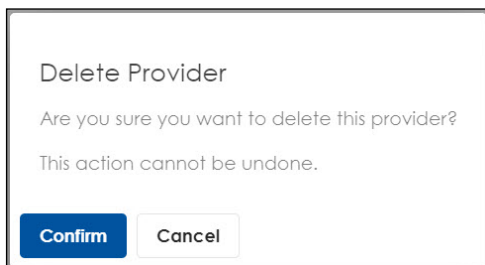

Figure 4: Delete Provider

Outputs

Outputs are digital channels where media can be scheduled. Once scheduled, the outputs will play media from the providers.

Create an Output

1. Navigate to the **Outputs** tab. Refer to **Figure 5**.

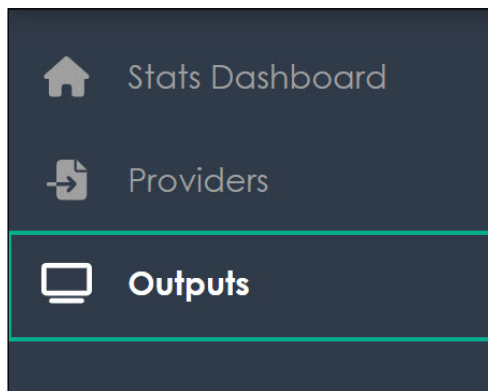

Figure 5: Outputs Tab

2. Click **Add New**.
3. Configure the **Output** as shown in **Figure 6**.
 - a. Enter a **Title** for the output.
 - b. Select a **Provider** from the drop-down menu.

Note: This drop-down menu is populated by providers created in the **Providers** tab.

7. Click **Save** to finish configuration.

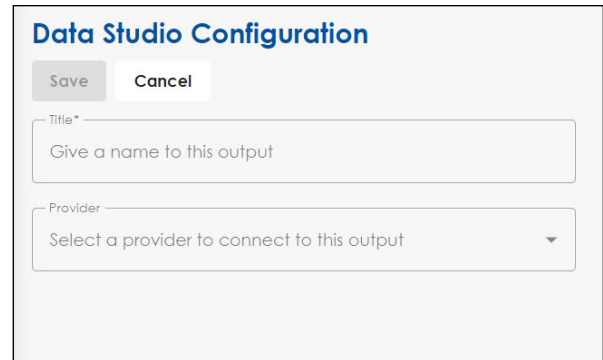

Figure 6: New Output Configuration

Edit an Output

1. Select an output from the **Outputs** tab.
2. Edit the **Title** or **Provider**.
3. Click **Save** to confirm.

Delete an Output

1. Select an output from the **Outputs** tab.
2. Click .
3. Click **Confirm** on the popup to delete.

Note: This process cannot be undone.

Stats Dashboard

The Stats Dashboard is where media provided by the provider is scheduled to outputs. Once scheduled, it is used to control the media. The media can either be current games or replays of past games. The Stats Dashboard lists **Recent** and **Upcoming Games** and is also used to quickly edit outputs.

Scheduling Media

Follow these steps to schedule a game or replay:

1. Navigate to the **Stats Dashboard** tab. Refer to **Figure 7**.

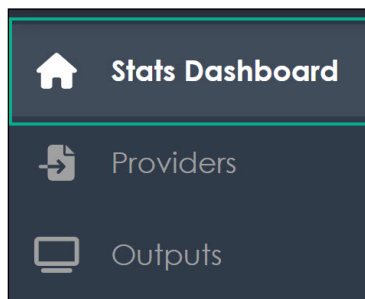

Figure 7: Stats Dashboard Tab

2. Click  on the output panel, and then click **Start Replay**. Refer to **Figure 8**.

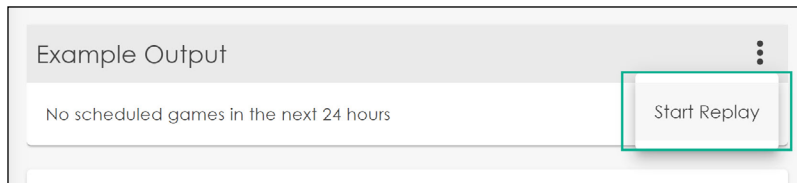

Figure 8: Start Replay

3. Select a **Season** and **Game**. Refer to **Figure 9**.

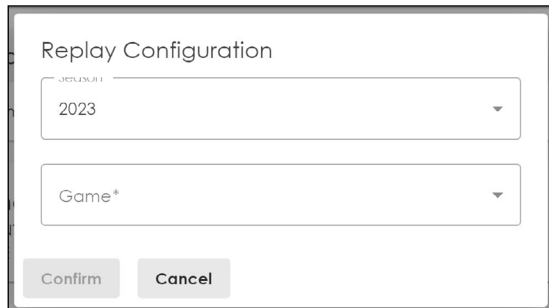

Figure 9: Replay Configuration

4. Click **Confirm** to begin the replay.

Controlling Media

Once a replay or game has been added to an output, the output can be controlled from the **Stats Dashboard**. The following is an overview of the controller features:

-  - Click to play the content.
-  - Click to pause the content.
-  - Click to stop and remove the content.
-  - Click and select a period or goal to jump to that point in the playback.
