Additional Notes:

Team Logos

To change or use Team logos in Inserts use logos located in

C:\ProgramData\AJT Systems\Football SportApp 2.7.6.xx\Templates\Logos\Teams

Color Selection Using Swatches

For some Inserts instead of selecting a team color via a color picker or typing in a hex/ARBG value, you have to select and image. This image is referred as a swatch because it contains multiple colors for each team. Use the corresponding .png swatch file inside the Swatches directory in C:\ProgramData\AJT Systems\MAM\Soccer\Shows\DefaultShow\Assets\Swatches

Headshots

When creating headshots use the headshots provided as a guide in

C:\ProgramData\AJT Systems\MAM\Soccer\Shows\DefaultShow\Assets\Headshots

FUll Screen Inserts with Sponsors

When using sponsors in the header/title you need to type 1 or 2 in the SponsorLayout field of the page. 1 is for squared sponsor images and 2 is for wider sponsor images.
