

Moving and Copying

You can easily move text to a new layout in a presentation by cutting or copying it and then pasting it in the new layout.

Tip: In addition to text, you can cut, copy, and paste just about any item in a presentation, graphics, and characters.

Copy Text

When you *copy* text, the selected text remains in its original location and a copy of it is added to a temporary storage area called the clipboard. See Fig. 1a

1. Select the text or object you want to copy.
2. Click the **Home** tab on the Ribbon and click the **Copy** button in the Clipboard group. Notice that unlike cutting, the original text remains in the document.
3. Select the location where you want to paste the copied content.
4. Click the **Home** tab on the Ribbon and click the **Paste** button in the Clipboard group.
The copied text or object is pasted to the new location.

Moving text typically involves the process of cutting and pasting. When you *cut* text, it is removed from its original location and placed in the Clipboard. See Fig. 1a
